Compared to the current LUIS design, is this workflow easier to use?

.

-

everything is fine and convenient to use

Mabey the text. If I ended up in rigth page after pressing on marketing. There were no where written marketing. Which was confusing.

A bit too simple. I'm already used to the old platform, switching to a new one requires effort

Everyhting was good

courses & other led to the same place

Im the developer.

Everything worked fast and i liked that there was also the course description available

Nothing

Everything was really good and clear

was fine

It was very easy to see all the necessary things just for the students, also the buttons are easily clickable and there is a smaller chance of a miss-click

Could only select course view.

mby too childlike?

everything was clear

User interface is way better

It felt quite simple

Maybe it wasn't included because it is just a prototype for the workflow, but seeing how many other students have enrolled would be nice.

no, everything was fine

There should be added buttons to go back to the previous menus. E.g. when I open course registration page I want to be able to easily go back to the main page. A simple "back" button would help.

I found it easy.

The course registration was very sjmple and i liked the clarifying pop-up. The only moment of confusion was that only a few of the buttons worked until i realised that its only meant to showcase the function for a few of them

Everything was great and much better than the current LUIS

nothing!

All clear

Everything felt clear

Everything was clear

The huge icons and not too much text was nice

No

Could only select “courses”. Other buttons didn’t work.

Only two buttons worked, so it was hard to test.
